

First Aid Report

Conversation:

You: hi

Bot: Hello! How can I assist you today?

You: i have burn

Bot: I'm sorry to hear that. Let's try to help you.

1. Cool the burn: Hold the burned area under cool (not cold) running water for 10 to 15 minutes or until the pain eases.
2. Cover the burn with a sterile bandage: Use a nonstick dressing if possible and wrap it loosely to avoid putting pressure on burned skin.
3. Take over-the-counter pain reliever: These include ibuprofen or acetaminophen. Never give aspirin to children.
4. Stay hydrated: Drink plenty of water and other fluids.

Remember, if the burn is severe (deep, larger than 2-3 inches, on the face, hands, feet, major joints, or genital area, or if the person is young, old, or has a weak immune system), causes severe pain, or if the person is having trouble breathing, call emergency services immediately.
